Chit-Chat

By EDMUND DUPLAGA, Ch.E., IV

Who said that the engineers are not sociable and cannot dance? Once again the engineers put away their slide rules, got their pretty girls, "shook a foot" to Frankie Reynolds' music, and enjoyed themselves tremendously at the Engineers' Prom which was a great success. Nice goin', boys. Let us continue to make all our affairs successful in years to come.

Wit

The other day while "yours truly" was pondering over the war, a friend, James C. Malavazos (Ch.E.IV), came in shouting, "The war is going to be over in 30 days." "Thirty days? How come?" asked yours truly. "Superman has been drafted," said he.

"Very, very clever. Don't you think so?"

During the intermission at the annual Engineers' Prom, Texnikoi, senior engineering activities society, honored 15 men in their traditional tapping ceremony. The senior members tapped are: David F. Bowman (E.E.), Clyde H. Kearns, Jr. (Ch.E.), and Ellsworth H. Shriver (Ch.E.). The junior members include William Booth (E.E.), Harold L. Geiger (Ag.E.), Walter E. Hendricks (Weld.E.), D. Edgar Holmgren (Cer.E.), Gordon C. Inskeep (Ch.E.), John L. Jones (I.E.), Robert S. McEwen (C.E.), Howard McFarland (I.E.), Lauren J. Rueger (E.P.), Jack Vogel (Arch.E.), William S. Wagner (Weld.E.), and William J. Verross (Ch.E.).

You Tell 'Em!

Man criticizes woman for her extravagance, but she never goes into a restaurant and buys a twenty-five cent meal and gives the waitress a twenty-five cent tip because she smiled at her.

Mr. Paul S. Shook, instructor of Engineering Drawing, is advisor of Quadrangle Jesters, all-engineer dramatic society, for this school year, replacing Mr. John "Chief" Younger, professor of Industrial Engineering. Sometime next quarter the Jesters are to present their annual production.

Did You Know That—

Some girls are like metals for they neck after applying a certain amount of strain? Their yield point is soon exceeded and a breakdown occurs ending the futile but valiant resistance offered to overcome the forces applied.

The man who gives up and says, "I can't," is usually right about it?

A Brain Twister

The total number of ducks and rabbits is two more than squirrels. The total number of ducks and squirrels is two more than the rabbits. The total number of squirrels and rabbits is two more than the ducks. How many of each are there?
